

BSP*link* AGENT NEWS

Welcome to the January 2016 Newsletter!

In this edition:

- Security Update – 1st December 2015 Internet Browsers
- BSP*link* Integration with IATA's Customer Portal
- Push Functionality to Agents

IATA Customer Service:
www.iata.org/cs

Developments for Release on Tuesday, 26th January 2016

Security Update – 1st December 2015 - Internet Browsers

The message was posted to give advanced notice to all users who do not have the TLS v1.1 and TLS v1.2 protocols enabled in their web browsers by default. The TLS1.0 protocol has been disabled in BSP*link* since 1st December.

Please click [here](#) for instructions on how to enable the protocols in IE, Chrome and Firefox.

BSP*link* Integration with IATA's Customer Portal

Integration Phase: The BSP*link* application will also be accessible through IATA's Customer Portal via "Single Sign On".

Additionally, WebServices will be implemented to manage users' account information and keep both IATA's Customer Portal and BSP*link* synchronised.

NOTICE:

Some deployments scheduled for December 2015 have been deferred to 26th January 2016 due to the impact of Single Sign On integration with Customer Portal.

Future Developments

Push Functionality to Agents

A new push functionality will be added for Agent users in order to deliver specific selected files.

The selected files will be received automatically by the agent as they will be pushed upon arrival at BSP*link* servers. Please note that this service will be only available to registered active Agent users.

"Move Out Of Your Comfort Zone. You Can Only Grow If You Are Willing To Feel Awkward And Uncomfortable When You Try Something New." [Brian Tracy]
