BSPlink AGENT NEWS
Welcome to the July 2015 Newsletter!

In this edition:

➢ **DISH 22.0**
➢ **PCI Password Management: Implementation on EC and AA**
➢ **BSPlink Integration with IATA's Customer Portal**

Developments for Release on Tuesday, 28th July 2015

DISH 22.0

On 1st July 2015, the following BSPs switched to DISH version 22: BW, IN, MW, MZ, ZA, ZM, ZW. Consequently, all transactions are reported and files are generated in the new format.

On 1st August 2015, BSP JP will switch to DISH 22 and on 31st August the following BSPs will also switch to the new DISH version: FJ, GU, TO and WS.

PCI Password Management: Implementation on EC and AA

On 20th July the PCI management policy has been activated in BSP EC and AA in order to strengthen the BSPlink management policy and secure sections of the BSPlink application.

Future Development

BSPlink Integration with IATA's Customer Portal

Preparation phase: BSPlink application will be modified in order to collect users' email addresses which will be used at a later stage by IATA's Portal Team to create Portal Users. To this end, BSPlink users will be asked to provide and validate an email address upon logging into BSPlink. This email will be stored and linked to that particular BSPlink user.
