Developments for Release on Tuesday, 26th July 2016

Notification: RC4 Stream Cipher Deactivation
(BSP*link* sFTP Account Users)

RFC 4253 advises against using the RC4 (Arcfour) stream cipher due to an issue with weak keys. Consequently, in order to comply with the industry standards for encryption and certificates, on 1st September 2016, Accelya will be disabling the RC4 stream cipher from their sFTP server.
