Welcome to the November 2017 Newsletter!

Agent

Reminder: BSPlink Credentials

BSPlink users are reminded not to share their passwords. Sharing account credentials can put organizational security at risk by exposing customer information and financial data to unauthorized users. Also, use strong passwords, and remember they need to be unique in every system and changed on a regular basis. Lastly, please remember that you can use the "**Forgotten Password?**" Link in the BSPlink home page to reset and reinforce your credentials.

Developments released

NGISS-New Location Type/Host Location Type additions

As a part of the NGISS Project, the agent master file and BSPlink form for registering new agents will be adapted to accept new values for the Location Type/Host Location Type regardless of the agent's class or environment type. The new values are:

- HE (Head Entity): being the result of merging HO (Head Office) and AO (Administrative Office) types
- AE (Associate Entity): being the result of merging BR (Branch Office) and SA (Specific Sales Activity) types. The corresponding queries containing agent's data will be modified to display these new values.

Future Developments

Delete Files and Delete Files Query options

This new functionality allows users to delete (from a file already in the user's container) an uploaded file. With the 'Delete Files Query', users can query the amended files. The two options 'Delete Files' and 'Delete Files Query', are available for the following users: Airline, BSP, DPC, Third Party, HOMU and MCMU under the 'FILES' module.

Payment Card Acceptance module

A new module called 'Card Acceptance' will be added, for the users to query and modify the acceptance of payment cards (or merchant agreements, if applicable) in BSPlink.
