

Reminder

- **Reminder: BSPlink Credentials**

Welcome to the April 2019 Newsletter!

Airline

Developments Released

- **PBDs – Download/Upload by Airlines**

Future Developments

- **DISH23 / Weblink-NDCLink Development Multi-country files in Weblink**

Reminder: BSPlink Credentials

BSPlink users are reminded not to share their passwords. Sharing account credentials can put organizational security at risk by exposing customer information and financial data to unauthorized users. Also, use strong passwords, and remember they need to be unique in every system and changed on a regular basis. Lastly, please remember that you can use the "**Forgotten Password?**" Link in the BSPlink home page to reset and reinforce your credentials.

Future Developments

PBDs - Download/Upload files by Airlines

The airline users (LOMU, LOSU, HOMU and HOSU) will be able to manage the Post-Billing Disputes issued by the agents through mass upload files. They will also be able to review the modifications made on Post Billing disputes during the day through a daily mass download file that will be received in the same way as the ACM/ADM or refund mass download files.

DISH23/WebLink-NDCLink Development: Multi-country files in Weblink

IATA will implement the DISH 23 version in different country waves along 2019. Since the Airlines can send multi-country files to the Weblink process, the version of the output files sent to the DPC and the Airlines will be controlled to send the files in each country version.

For internal contacts to BSPlink team, please open an internal Salesforce case and escalate through "Operational Tools - HO" queue.
