

Reminder

- **Reminder: BSPlink Credentials**

Future Developments

- Commission Control Query and Self-service update
- Weblink and NDCLink files for ARC

Welcome to the April 2018 Newsletter!

Airline

Reminder: BSPlink Credentials

BSPlink users are reminded not to share their passwords. Sharing account credentials can put organizational security at risk by exposing customer information and financial data to unauthorized users. Also, use strong passwords, and remember they need to be unique in every system and changed on a regular basis. Lastly, please remember that you can use the "**Forgotten Password?**" link in the BSPlink home page to reset and reinforce your credentials.

Future Developments

Commission Control Query and Self-service update

With these new options, airlines will be able to define, update and query the setups of their commission controls in BSPlink and the transmittal of that information to other related users (agents, BSP, GDS, DPC).

Also, Agents and GDS will have a Commission Control email alert in case changes are performed by the Airline.

Weblink and NDCLink files for ARC

A new option in the Weblink environment will be created for the IATA user to configure airlines that can send US transactions in their TCN and RET format multi-country files for processing at the Weblink and NDCLink level.

The RETs generated will have the following naming convention: USegNDCLINK_AAA and USegWEBLINK_AAA (where AAA = Airline code).

For internal contacts to BSPlink team, please open an internal Salesforce case and escalate through "Operational Management - HO" queue.
