BSPlink Enhancement for ADM Policy Enhancement

URGENT UPDATE: As part of changes to Resolution 850m approved by PaConf, effective as from 1 June 2014, it has been announced that airlines were required to have a link, in BSPlink (ASD in China), to their respective ADM policies in order to continue to be able to issue ADMs in BSPlink as mandated tool for debit memo processing.

Following requests from multiple airlines and in agreement with PaConf Chairman, the systemized mandation in BSPlink requiring airlines to publish a URL link to their ADM policy website is being deferred to 31st December 2014.

 **Developments for Release on Tuesday, 26th August 2014**

BSPlink Options Enhancement

The BSPlink application will be enhanced to allow only the selection of the periods available within the corresponding year and month when querying using the following options:

DOCUMENTS

- Net-Remit Documents

Future Development

DISH 22

The BSPlink application will be modified to accept the new version of the Data Interchange Specifications Handbook, DISH22, which was published on January 1st, 2014. The new changes will include, amongst others, modifications to the HOT loading process, the direct refund loading process ('ed' files), the BSPlink RET file generation and to the Weblink system.

vMPD Sunset Communication

The IATA e-Services project supports the travel and tourism industry in facilitating the sales and collection of ancillary services through all distribution channels – including travel agents and online airline sales - using IATA's electronic miscellaneous document (EMD) standard.

EMD will become the new industry standard to replace current vMCO/vMPD document for services such as charges for ancillary services, amendment fees and refunds. Please note that vMCO is no longer accepted in IATA BSP.

From July 1st, 2014 vMPD issuance has been shut down in 56 BSPs and only the below environments will continue to accept vMPD until October 31st, 2014:

- All BSPs in Latin America including Caribbean
- Malaysia, Singapore, Australia, Japan, Korea, Hong-Kong, Chinese Taipei, India, Sri Lanka
- Russia, Ukraine, Turkey, Italy
- Gulf Area

For meeting the industry deadline please work closely with your IT/GDS partner(s) as well as informing your travel agents on your latest EMD development. For more information regarding the industry progresses please visit:

For other enquires please log on to IATA Customer Portal: <http://www.iata.org/customer-portal/Pages/index.aspx>

GDS Corner

Automated Ticketing Authority Files

1. Currently, the GDS user has no option to assign GDS to all existing agents or to assign GDS to all new agents. Within the GDS Agent Management option, a new functionality and a new parameter will be created as follows:

- A new functionality called “Assign GDS to all existing agents” which will allow the GDS to add all active agents.

- A new parameter called “Assign all new agents” which, if enabled, will result in all new agents being automatically assigned the GDS.

2. The TA Global files will be modified to trigger DEL/ADD actions when the airline's abbreviation code is modified.
