

BSPlink AIRLINE & GDS NEWS

Welcome to the January 2015 Newsletter!

In this edition:

- Weblink TCN Version

GDS

- Phase II: TA DEL Files for TA Synchronization

IATA Customer Service:
<http://www.iata.org/customer-portal/Pages/index.aspx>

Future Development

Weblink TCN Version (Airline)

The Weblink validations on the COUN fields of TCN format files will be modified. The new validations on the COUN field will consist of the following: as long as there are 'F' coupons left within a given transaction CPUI, including conjunction tickets (if any), all CPUI values will be reflected in COUN with their relative position.

Backward compatibility will be maintained and the new validation will only be applied whenever the TCN format file contains the string 'WEBLINK2' in the first positions of the Header's 'FILL' field (positions 45 - 52).

GDS Corner

Developments for Release on Tuesday, 27th January 2015

Phase II: TA DEL Files for TA Synchronization

A new option will be added to the GDS menu in BSPlink, through which the user will be able to request a "Delete File for Non-TA records" in TXT or XML format, with information of the country in which the user is logged in. The file will be generated after the scheduled Global TA File and delivered to the GDS's BSPlink container.
