

BSPlink AIRLINE & GDS NEWS

Welcome to the March 2015 Newsletter!

In this edition:

- Weblink TCN Version
- Rejected Documents
- BSPlink User E-mail Notifications
- Additional Upload sFTP Account for Airlines
- vMPD Users Termination
- FCMI on Related Document for ADMs

GDS

- No related development this month

**Developments for Release on
Tuesday, 31st March 2015**

Weblink TCN Version

The Weblink validations on the COUN fields of TCN format files will be modified. The new validations on the COUN field will consist of the following: as long as there are 'F' coupons left within a given transaction CPUI, including conjunction tickets (if any), all CPUI values will be reflected in COUN with their relative position.

Backward compatibility will be maintained and the new validation will only be applied whenever the TCN format file contains the string 'WEBLINK2' in the first positions of the Header's 'FILL' field (positions 45 - 52).

Rejected Documents

Some documents were rejected when the RTDN, included in the Refund documents, belonged to a range series that was defined for a document type without coupons.

The system has been modified and the validation has been eliminated. Now the airlines can include RTDNs with coupons, even if they belong to a series defined in BSPlink for a document type without coupons.

www.iata.org/cs

BSPlink User E-mail Notifications

After the access credentials are reset, the Airline users will receive the email notification with the new access.

Additional Upload SFTP Account for Airlines

Airline users will be able to create a second upload SFTP account through the option: SUB-SERS MANAGEMENT -> "Additional Upload SFTP Account".

The second account will be named as: upload2CCUUU, where CC is the ISOC and UUU is the Airline code.

vMPD Users Termination

After vMPD sunset (March 31st, 2015), Airline vMPD users will be expired.

Future Developments

FCMI on Related Document for ADMs

When a related document is available in BSPlink, the BSPlink application will auto-populate the corresponding FCMI field for those related documents in the ADM module. If one or more related documents do not exist in BSPlink or are no longer available, the corresponding FCMI will be reported as blank.

GDS Corner

No related development this month.
