Welcome to the March 2018 Newsletter!

Airline

Reminder: BSPlink Credentials

BSPlink users are reminded not to share their passwords. Sharing account credentials can put organizational security at risk by exposing customer information and financial data to unauthorized users. Also, use strong passwords, and remember they need to be unique in every system and changed on a regular basis. Lastly, please remember that you can use the "**Forgotten Password?**" link in the BSPlink home page to reset and reinforce your credentials.

Developments released

Delete Files and Delete Files Query options

This new functionality will allow users to delete a file they have uploaded (which is already present in the user's container) as well as query the deleted files.

The two options ('Delete Files' and 'Delete Files Query') are available for the Airline, BSP, DPC, Third Party, HOMU and MCMU users, under the 'FILES' module.

Future Developments

Commission Control Query and Self-service update

With these new options, airlines will be able to define, update and query the setups of their commission controls in BSPlink, and the transmittal of that information to other related users (agents, BSP, GDS, DPC). Also, Agents and GDS will have a Commission Control email alert in case changes are performed by the Airline.

For internal contacts to BSPlink team, please open an internal Salesforce case and escalate through "Operational Management - HO" queue.
