## Welcome to the May 2018 Newsletter!

### Airline

### **Reminder: BSPlink Credentials**

BSPlink users are reminded not to share their passwords. Sharing account credentials can put organizational security at risk by exposing customer information and financial data to unauthorized users. Also, use strong passwords, and remember they need to be unique in every system and changed on a regular basis. Lastly, please remember that you can use the "**Forgotten Password?**" Link in the BSPlink home page to reset and reinforce your credentials.

### **Developments Released**

#### **ADM Policy Email Alert**

BSPlink notifications related to the ADM Policy have been adjusted in order to align with PAC Resolution 850m, which will take effect on June 1<sup>st</sup>.

### **Future Developments**

#### **Commission Control Query and Self-service update**

With these new options, airlines will be able to define, update and query the setups of their commission controls in BSPlink and the transmittal of that information to other related users (agents, BSP, GDS, DPC).

Also, Agents and GDS will have a Commission Control email alert in case changes are performed by the Airline.

#### **Weblink and NDCLink files for ARC**

A new process will be developed where specifically configured airlines will be able to send US transactions in multi-country TCN and RET format files for processing at Weblink and NDCLink level. The RETs generated will be pushed to the ARC system with the following naming convention: USegNDCLINK\_AAA (where AAA = Airline code) and USegWEBLINK\_AAA.

The RETs generated will have the following naming convention: USegNDCLINK\_AAA (where AAA = Airline code) and USegWEBLINK\_AAA.
