Airlines

- Notification: RC4 Stream Cipher Deactivation

GDS

- No applicable development

Reminder

Notification: RC4 Stream Cipher Deactivation (BSPlink sFTP Account Users)

RFC 4253 advises against using the RC4 (Arcfour) stream cipher due to an issue with weak keys. Consequently, in order to comply with the industry standards for encryption and certificates, on 1st September 2016, Accelya has disabled the RC4 stream cipher from their sFTP server.

GDS

No Applicable Development.
