Welcome to the September 2011 Newsletter!

In this edition:

- Maintenance of the TSP master table by the GDSs

Developments for release on
Tuesday 27th September

Permit the GDSs to maintain the TSP master table

As announced in previous newsletters, the development to permit the GDSs to update the TSP master table has now been released and is available in their browser.

However, it has been agreed between IATA and the GDSs that the transfer from the BSPs to the GDSs of the responsibility to maintain this table will be gradual and, prior any change to the current maintenance of the TSP master table, a phased implementation plan will be put in place and communicated to the BSPs as soon as possible.

Until further notice, the BSPs will continue to maintain the TSP master table.
