**Reminder**
- **Reminder: BSPlink Credentials**

**Future Developments**
- **Commission Control Query and Self-service update**

## Welcome to the August 2018 Newsletter!

### GDS

### Reminder: BSPlink Credentials

BSPlink users are reminded not to share their passwords. Sharing account credentials can put organizational security at risk by exposing customer information and financial data to unauthorized users.
Also, use strong passwords, and remember they need to be unique in every system and changed on a regular basis.
Lastly, please remember that you can use the "**Forgotten Password?**" Link in the BSPlink home page to reset and reinforce your credentials.

Last year we informed that certain sftp protocols would have to be removed from Accelya's servers to ensure enhanced safety and security.

The customers who used to access to sftp.accelya.com with this removed protocol will be impacted by this change, therefore, such users should take the following actions in order to be able to upload or download the files on sftp.accelya.com after this change.

Users must ensure that their SFTP client software is updated to the latest version and that they accept the new fingerprint when first connecting both to the test server as well as the production server sftp.accelya.com.

If required, further information can be obtained from IATA customer service (**www.iata.org/cs**).

### Future Developments

### Commission Control Query and Self-service update

With these new options, airlines will be able to define, update and query the setups of their commission controls. This information will be also available to other related users (agents, BSP, GDS, and DPC) in BSPlink System. Agents and GDS users will have the possibility to set a Commission Control email alert to be notified in case any changes are performed by the Airline.
